Education

Cornell Duffield Engineering – Information Science, Systems, and Technology
Dec 2027 | GPA: 3.7 | Concentrations: Interactive Technology and UX Design | Minor: AI
Design: Human-AI Interaction Design Research, Designing AI Products, Digital Product Design, Cognitive Science.
Technical: Machine Learning, Object-Oriented Programming & Data Structures, Prob & Stats, Operations Research.

Experience

Develop for Good – Design Manager Intern
May 2026 - Aug 2026
Designed an application portal for the Société Béninoise d'Energie Electrique, facilitating electricity access for underserved regions in Benin by **designing robust error-handling** for document uploads and agent feedback loops.

Hudson Valley Textile Project – Contract Product Manager and Designer
Jan 2026 - July 2026
Led a team of **9 developers & designers** to build a wool inventory system. Leveraged user research on wool supply chain to design cross-platform workflows that **eliminate entry errors and publicize real-time inventory**.

CampusCares – Design Engineer
Nov 2025 - May 2026
Conducted iterative **usability testing** to identify friction points and **vibe coding high-fidelity designs using React**, leading to a simplified, more intuitive interface for student volunteers and admins.

RethinkFood – Contract Product Designer
Sep 2025 - Dec 2025
Iterated on data visualizations to improve financial transparency and highlight Rethink Food's impact on serving communities in need. **Prioritized metrics and data visualizations based on user interviews** with potential donors.

Alaska Children's Trust – Contract Product Designer
Feb 2025 - May 2025
Designed a gamified conversation starter deck that balanced educational resources with high user engagement. Presented at Cornell's BOOM 2025, highlighting strategies for **accessible UI in low-tech-literacy environments**.

Campus

Cornell Center for Teaching Innovation – Analysis Team Lead, Senior AI Fellow
Apr 2026 - Present
Leading team to analyze undergraduate **student sentiment and usage of GenAI tools** using Python and R. Findings will be disseminated as policy recommendations and effective AI adoption frameworks for instructors and students.

Cornell Hack4Impact – Design Lead
Jan 2026 - Present
Overseeing **12 designers** across **6 client projects** while providing guidance on incorporating vibe coding to streamline the designer to development handoff. Leading organization wide initiatives across branding, recruitment, and socials.

Cornell Operations Research and Information Engineering - Undergraduate Researcher
Sep 2025 - May 2025
Engineered a **human-in-the-loop** multi-stage prompting strategy to align an **LLM-based privacy policy classifier** with expert librarian decision-making, improving model reliability and interpretability across 5 rubric categories.

Girls Who Code - Volunteer Instructor
Feb 2025 - Present
Translating technical **data science** (Python) and **web development** (HTML/CSS, JS) concepts into an accessible curriculum for **15+** middle to high school students, fostering digital literacy and confidence in learning new skills.

Skills

Toolkit
Figma, Framer, WordPress, HTML/CSS, React, Python, Java, SQL, Tableau, R, Pandas, Matplotlib, scikit-learn

Design
User Interviews, User Surveys, Hierarchical Task Analysis, Think Aloud Study, Service Blueprint, Affinity Diagram, User Persona, User Journey Map, Feature and Content Ideation, Priority Matrix, Information Architecture, Prototyping, User Testing
